The New NIH Biosketch

Why?

- Allows applicants to:
- describe the magnitude and significance of their scientific contributions (including publications)
- provide more detailed information about their research experience in the context of the proposed project

When?

- ~~NIH Biosketch: optional format for due dates before 5/25/15~~
- New NIH Biosketch: **mandatory** format for due dates 5/25/15 and beyond

NIH Biosketch spotter's guide

original format

BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors.
Follow this format for each person. **DO NOT EXCEED FOUR PAGES.**

NAME	POSITION TITLE		
eRA COMMONS USER NAME (credential, e.g., agency login)			

EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable.)

INSTITUTION AND LOCATION	DEGREE (if applicable)	MM/YY	FIELD OF STUDY

updated format

BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors.
Follow this format for each person. **DO NOT EXCEED FIVE PAGES.**

NAME:

eRA COMMONS USER NAME (credential, e.g., agency login):

POSITION TITLE:

EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable. Add/delete rows as necessary.)

INSTITUTION AND LOCATION	DEGREE (if applicable)	Completion Date MM/YYYY	FIELD OF STUDY

New NIH biosketch, Section A

A. PERSONAL STATEMENT

I have the expertise, leadership, training, expertise and motivation necessary to successfully carry out the proposed research project. I have a broad background in psychology, with specific training and expertise in ethnographic and survey research and secondary data analysis on psychological aspects of drug addiction. My research includes neuropsychological changes associated with addiction. As PI or co-Investigator on several university- and NIH-funded grants, I laid the groundwork for the proposed research by developing effective measures of disability, depression, and other psychosocial factors relevant to the aging substance abuser, and by establishing strong ties with community providers that will make it possible to recruit and track participants over time as documented in the following publications. In addition, I successfully administered the projects (e.g. staffing, research protections, budget), collaborated with other researchers, and produced several peer-reviewed publications from each project. As a result of these previous experiences, I am aware of the importance of frequent communication among project members and of constructing a realistic research plan, timeline, and budget. The current application builds logically on my prior work. During 2005-2006 my career was disrupted due to family obligations. However, upon returning to the field I immediately resumed my research projects and collaborations and successfully competed for NIH support.

1. Malicka J, Gryczynski I, Gryczynski Z, Lakowicz JR. Effects of fluorophore-to-silver distance on the emission of cyanine-dye-labeled oligonucleotides. *Anal Biochem.* 2003 Apr 1;315(1):57-66. PubMed PMID: [12672412](#); PubMed Central PMCID: [PMC2753827](#).
2. Lakowicz JR, Malicka J, Gryczynski I. Increased intensities of YOYO-1-labeled DNA oligomers near silver particles. *Photochem Photobiol.* 2003 Jun;77(6):604-7. PubMed PMID: [12870845](#); PubMed Central PMCID: [PMC2753835](#).
3. Zhang J, Lakowicz JR. Metal-enhanced fluorescence of an organic fluorophore using gold particles. *Opt Express.* 2007 Mar 5;15(5):2598-606. PubMed PMID: [19532498](#); PubMed Central PMCID: [PMC2739992](#).
4. McNay EC, Ong CT, McCrimmon RJ, Cresswell J, Bogan JS, Sherwin RS. Hippocampal memory processes are modulated by insulin and high-fat-induced insulin resistance. *Neurobiol Learn Mem.* 2010 May;93(4):546-53. PubMed PMID: [20176121](#); PubMed Central PMCID: [PMC2878207](#).

New NIH biosketch, Section C

C. Contribution to Science

1. My early publications directly addressed the fact that substance abuse is often overlooked in older adults. However, because many older adults were raised during an era of increased drug and alcohol use, there are reasons to believe that this will become an increasing issue as the population ages. These publications found that older adults appear in a variety of primary care settings or seek mental health providers to deal with emerging addiction problems. These publications document this emerging problem but guide primary care providers and geriatric mental health providers to recognize symptoms, assess the nature of the problem and apply the necessary interventions. By providing evidence and simple clinical approaches, this body of work has changed the standards of care for addicted older adults and will continue to provide assistance in relevant medical settings well into the future. I served as the primary investigator or co-investigator in all of these studies.
 - a. Role of stereotactic radiosurgery in patients with more than four brain metastases. CNS oncology.
 - b. Neurodevelopmental Outcomes of Extremely Low Birth Weight Infants with Spontaneous Intestinal Perforation or Surgical Necrotizing Enterocolitis. the Journal of Perinatology.
 - c. Brodsky FM, Chen CY, Knuehl C, Towler MC, Wakeham DE. Biological basket weaving: formation and function of clathrin-coated vesicles. Annu Rev Cell Dev Biol. 2001;17:517-68. PubMed PMID: [11687498](#).
2. In addition to the contributions described above, with a team of collaborators, I directly documented the effectiveness of various intervention models for older substance abusers and demonstrated the importance of social support networks. These studies emphasized contextual factors in the etiology and maintenance of addictive disorders and the disruptive potential of networks in substance abuse treatment. This body of work also discusses the prevalence of alcohol, amphetamine, and opioid abuse in older adults and how networking approaches can be used to mitigate the effects of these disorders.
 - a. Geddes CD, Parfenov A, Lakowicz JR. Photodeposition of silver can result in metal-enhanced fluorescence. Appl Spectrosc. 2003 May;57(5):526-31. PubMed PMID: [14658678](#); PubMed Central PMCID: [PMC2737405](#).
 - b. Lakowicz JR, Malicka J, Gryczynski I. Increased intensities of YOYO-1-labeled DNA oligomers near silver particles. Photochem Photobiol. 2003 Jun;77(6):604-7. PubMed PMID: [12870845](#); PubMed Central PMCID: [PMC2753835](#).
 - c. Malicka J, Gryczynski I, Fang J, Lakowicz JR. Fluorescence spectral properties of cyanine dye-labeled DNA oligomers on surfaces coated with silver particles. Anal Biochem. 2003 Jun 15;317(2):136-46. PubMed PMID: [12758251](#); PubMed Central PMCID: [PMC2737417](#).

Linking an eRA Commons account

The diagram illustrates the process of linking an eRA Commons account to an iTrust NIH account. On the left, the 'Sign in to NCBI' page features a green 'eRA Commons sign in' button. A red arrow points from this button to the right, where the 'iTrust NIH SECURE IDENTITY SOLUTIONS' login page is shown. This page includes input fields for 'User Name' and 'Password', a 'Log in' button, and a 'Change Password' link.

First time using this sign in pathway?

Signed in to NCBI via a Partner Organization

Congratulations, you have successfully signed in to NCBI via a partner sign in route. You now have the option to create a new NCBI account based on this sign in route OR link it to an existing NCBI account you may already have.

Please choose one of the following options:

☐ Create a new NCBI account

☒ Link to an existing NCBI account

NCBI accounts may be linked to one or more partner sign in accounts.
Use this option to link this sign in route to an existing NCBI account that you may already have.

SciENCv and NSF

NSF SciENcv Pilot – Smoke Test Only

- Important Note: It is not recommended that users submit biosketches from the tool at this time
 - This pilot is designed purely to gauge user feedback and assess the functionality
 - Updates are still being made to the tool so that it will generate NSF-specific biosketches
 - Users and submitting organizations will still be required to ensure their submittals are in compliance with NSF Policy
- Questions and Immediate Feedback can be sent directly to SciENcv@nsf.gov
